Operating Systems I Have Used

1. Microsoft Windows

Windows is the operating system I have used for almost my entire life. As a result, it is the most familiar to me.

Advantages:

1. Affordable computers (Usually more affordable than Macintosh computers)
2. Ubiquity (the most common OS in the world)
3. Endless library of software

Disadvantages:

1. Virus are more common for Windows (Since there are more of them)
2. Compatibility with older software/games (Especially a problem with Windows 10)
3. Microsoft's handling of Windows 10 (e.g. Advertisements in start menu, computer manufacturer's bloatware, constant push for Microsoft's applications)

2. Apple iOS

Recently, I have transitioned over to iOS from Android. Despite my familiarity with Android, I prefer iOS for its streamlined user-interface, and software support.

Advantages:

1. Very user-friendly interface (Easy for anyone to navigate)
2. Excellent software support (Guaranteed updates for 5 years or more)
3. Better integration with Apple's ecosystem (Macintosh computers, Airdrop, Apple TV)

Disadvantages:

1. Far less customizable (Widgets were just introduced, a decade after Android)
2. Restrictive file management (You must use iTunes or iCloud to load files, videos, and photos onto the device)
3. Less available apps (Many apps that exist for Android are simply not available for iOS)

About

Device specifications

YOGA 730-15IWL

Device name

OTOKO

Processor

Intel(R) Core(TM) i7-8565U CPU @ 1.80GHz 2.00 GHz

Installed RAM

12.0 GB (11.8 GB usable)

Device ID

E6AF04B1-F484-4921-91E6-849467B4003A

Product ID

00325-96575-51193-AAOEM

System type

64-bit operating system, x64-based processor

Pen and touch

Pen and touch support with 10 touch points
